Figures and Facts from January 1st to September 30th 2012

Kantha Bopha in Phnom Penh and Siem Reap Angkor:

Admissions for Hospitalization of severely sick children: **103 163**

Admissions for Hospitalization of severe cases of HDF: **24 199**

We are grateful for all donations. If small or big. Most families of our patients are poor. They could not pay. That is why all treatment for all is free.

Although the Hospitals were overcrowded additionally we could do **heart surgery in Siem Reap Angkor**. 21 children were successfully operated. The over all mortality rate in the Kantha Bopha Hospitals is 0.4%. As soon we can cure and save 600 children with congenital heart malformation per year, the mortality rate will be reduced to 0.3%.

Dr. Beat Richner, Founder and Head of the Kantha Bopha Hospitals, October 1st 2012
