

Dr. Beat Richner, Kantha Bopha Children's Hospitals

Phnom Penh / Siem Reap Angkor, 27. June 2013

# **Semi Annual Report Of The Kantha Bopha Hospitals**

**(1 January -24 June 2013)**

Admissions for hospitalization of severely sick children: **52053**

Severe cases of the Hemorrhagic Dengue Fever: **4127**

Surgical operations: **7849**

**Head Trauma: 1847 !!! (12,5% to be operated by our surgery)**

Deliveries: **8259**

During the speech of **President Barack Obama** in Berlin I think having heard the following words being shouted to the cheering crowds waiting 3 hours in the heat: **We should think on the poor too! No more children should suffer and pass away from diseases, which could be healed. We should find other and new models in the global health sector not depending on charity.**

**Kantha Bopha is a world model** functioning the day and the night without corruption. It is a model of justice and medical commitment. All treatment is free for all. But although its correlation between costs and healing rate is worldwide the best, still 80% of the budget are depending on charity.

Why the states who have caused whole the misery in Cambodia bringing and supporting the war, supporting the following civil war, supporting the Khmer Rouges, do not contribute a single Dollar to the budget of Kantha Bopha which is actually preventing a passive genocide of Cambodian children by the hard and highly professional work in the heat by 2450 Cambodian staff, the day and the night?

Maybe President Barack Obama is questioning this too and is aware on the Model Kantha Bopha -unique in the world- from the article in November 2012 "**What President Barack Obama could have learned in Cambodia**". This article you can find in Google (putting in its title) or on our home page.

**The Model Kantha Bopha is no dream, it is reality.** But it depends still today, after 21 years, on charity by 80%. We thank you for all your financial contributions.

**Dr. Beat Richner, Head and Founder of the Kantha Bopha Hospitals**
