

**94 deliveries the day and the night
at Jayavarman (Kantha Bopha III) in Siem Reap Angkor**

On 14th September 06.00 am up to September 15th 06.00 am there were 94 deliveries. This is the maximum ever since the inauguration of the maternity on October 2001.

This is a huge and highly qualified work the staff is doing, the day and the night.

On September 14th, **479** pregnant women were examined and treated in the outpatient station of the maternity.

On September 15th early morning there are **222** happy mothers with their healthy newborn child hospitalized.

Most families are poor, very poor, that's why all treatment is free for all.

No one staff is taking money from the families, No one staff is working outside in a private clinic.

Dr. Beat Richner, Founder and Head of Kantha Bopha since 1992
